Product Description

Briefly describe the product. You should include the following: what the product will do, who the target users will be and how this product will benefit the sponsor.

This project is about developing an education tracking system. It will be oriented to teachers as they will be creating reports about their students and also putting their grades in the system. It will also be oriented to the students since they will be able to see how they are doing and see the reports and comments of their own teachers. The sponsor will be benefited since that way they won't need to have a physical environment have this information and won't need to spend time in doing unnecessary searching. This way if some parent wants to see how their children are doing, they will just need to log into the system and see the reports.

Required Features

The administrator will create accounts and give student or teacher permissions. They will also assign students to the teachers for them to see and modify only the ones they are teaching at the moment. The teachers will have permission to assign grades to their students and to create comments about them to help their parents to see how well they are behaving. The students will only have the permission to see their grades and comments. The system will have username and password identification to see and give permission to the information they might see and modify. This information will be hashed.

Stretch Goals

A corporation e-mail is going attached to this system in order to, when a teacher assign a grade or a comment, a notification will be sent from the corporation(school) e-mail to the child's parent to let them know that a change has been made.

Student Developer Responsibilities

1. Deliver the required features described above.
2. Maintain weekly contact with the sponsor (in person or over the phone).
3. Keep the sponsor apprised of any challenges that arise in a timely manner. If changes are required, discuss them with the sponsor and obtain approval using the Feature Change Request document.

Sponsor Responsibilities

1. Be available for contact each week (in person or over the phone).
2. Help define use cases and desired functionality.
3. Provide honest feedback at the end of the semester.
4. Recognize that neither the students nor BYU-Idaho can be held responsible for maintaining or supporting this product going forward.

Approval

By signing below, we indicate our approval of the conditions outline above.

Student One

Victor Boxall

Date

30/01/2021

Student Two

Ye Lina

Date

30/01/2021

Student Three
